Kerbstone's unique aged appearance is ideal for use in areas where natural and unobtrusive edging is required. It will harmonise with Tegula pavements as well as areas that have been laid with other Tobermore paving systems.

Kerbs are easy to achieve with Kerbstone's unique block design and its aesthetic appearance ensures that it complements surrounding landscaped areas as well as paths, patios and driveways.

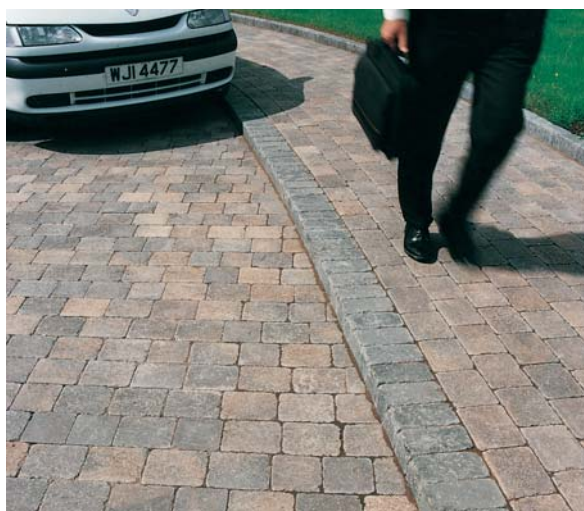

Installation

Kerbstone is installed in a similar manner to Tobermore Kerbsett, laid on a concrete kerb-base and haunched as traditional kerbing. Either mortar bonding or close, dry joints may be used between blocks, at the specifier's discretion.
