Sienna emulates traditional natural granite. The coarse textured surface exposes the sparkling black and white granite aggregates to provide a distinctive silver appearance similar to natural granite.

Sienna provides the aesthetic qualities which can match the traditional splendour of period design or add character to modern buildings.

Areas of Sienna can be interspersed with Tegula Setts as banding or Granite Country Kerbs to contrast and complement its distinctive surface finish.

Sienna's 'pencil' chamfer and narrow joint width reduce maintenance levels and produce a surface which is easily trafficked by pedestrians, prams, wheelchairs and vehicles.

Sienna Duo is now available with both block sizes supplied on one pallet.
