

Tobermore Turfstone is a grass paving system designed for use in areas where a hard surfacing is required for vehicular access in a natural grass environment. Tobermore Turfstone's honeycombed cavities are designed to facilitate the growth of grass within a supporting concrete matrix, allowing grass to be cut in the conventional manner.

Turfstone can be used in caravan parks, cemeteries, car parks etc. in addition to typical environmental erosion control areas such as riverbanks and waterways.

Tobermore Turfstone is laid as a normal paving unit but with the honeycombed areas filled with quality topsoil and suitable grass seed.

For installation guidelines please go online or contact the Tobermore Sales Office.

product specifications

Manufactured to	BS EN 1338:2003
Performance criteria	Strength > 3.6MPa or 250 N/mm
Product type	Concrete paving block
Installed to	BS EN 7533-3:2005
Applications	Residential and commercial
Complementary paving	Not applicable
Complementary kerbs	Half Battered
Permeable product	No

Tobermore operate an Integrated Management System and is an accredited ISO9001:2000 and ISO14001:2004 company.
