The Challenge

Attractive paving for a rural housing development.

Bennett Homes launched Abbotts Grange, an award-winning development in the attractive Norfolk village of Fornsett St. Peter, for new homebuyers and families seeking rural living.

Andrew Higgon, Senior Quantity Surveyor at Bennett Homes explained the objectives of the scheme: *“Our vision was to produce an attractive, manageable residential development that would appeal to home-buyers and families.”*

Andrew explained the landscaping brief: *“We wanted to find a suitable balance between hard and soft landscaping features, offering alternative open space to the residents and practical useable driveways. It was also important that we created a contrast between the driveways and the main adoptable road on the development.”*

The Solution

Tobermore Roma block paving system.

With a wide-ranging product selection, Tobermore was well-equipped to provide Bennett Homes with a hard landscaping solution that would surpass expectation on an aesthetic level and achieve that all important Norfolk country charm for the development.

Tobermore's Roma block paving was specified in the softly blended colours of Bracken and Slate – the ideal choice to work with the surrounding natural colour tones on site.

The success of Abbotts Grange resulted in Bennett Homes being named 'Housebuilder of the Year' for the fourth time by the National Federation of Builders, one of the UK's most prestigious construction industry awards.

Our decision to use Tobermore Products was based primarily on the appearance of the product. We felt that it suited a more 'up market' development and this was one of our goals for Abbotts Grange.
