ESH Group

The Challenge

TGP Landscape Architects Ltd was assigned the task of designing the landscape at Greg's Place, a vibrant new outdoor community space which recently opened at the University of York, replacing the previous dilapidated Vanbrugh Piazza.

Andrew Gardener, Director at TGP explained the selection of materials for the landscape at Greg's Place: *"For the hard landscaping, we knew that paving needed to be a versatile, cost effective, hard-wearing solution for the scheme."*

The Solution

Manhattan Paving Solution.

Tobermore paving products were an obvious choice for TGP and Andrew was particularly impressed with Tobermore's Manhattan plank paving system: *"I liked the large format size; the mixed size units and the variety of colours available with the product are impressive and it is always good to see paving that is different to the standard often seen in public spaces."*

We are delighted with the finished look of the scheme and the University is pleased that students, staff and visitors are making use of the area in a way they never did before. We are very happy with the products supplied by Tobermore as they have given a great contemporary feel to the space. We plan to use Tobermore products again for forthcoming projects.
