Landscape Architect Southern Green

The Challenge

Southern Green, a landscape architecture firm based in Gateshead, was appointed to design the landscape at Northshore Innovation Centre.

Southern Green, a landscape architecture firm based in Gateshead, was appointed to design the landscape at Northshore Innovation Centre, a project that is part of a wider regeneration masterplan in Stockton-on-Tees, which has been referred to as one of the most exciting regeneration developments in the north of England in recent years.

Liam Haggarty, Associate Architect at Southern Green explained: *“The objective of the project was to provide Teeside University with a hub of innovation for emerging and ambitious technology companies.”*

With this in mind, a landscape design with a contemporary edge was needed. Southern Green decided that block paving was the best hard landscaping solution to employ.

The Solution

Tobermore provided Southern Green with a variety of hard landscaping products that offered modern aesthetics to complement the new building whilst protecting against pavement shifting.

The landscape architect liaised with Tobermore's North East Sales team in sourcing suitable paving products. Southern Green was particularly impressed with the modern finishes of Chieftain VS5, Fusion and Sienna block paving that enhanced the contemporary aesthetic of the Northshore building. These products are manufactured with a sparkling granite aggregate surface layer that produces a look similar to natural granite.

Liam explained why Tobermore paving was the top choice for Southern Green's landscape design concept: *“We specified Tobermore products for aesthetic reasons and for their technical capabilities. The larger unit Chieftain VS5 product is only offered by Tobermore, and the product range suited the palette of materials used for the construction of the Northshore building.”*

Now complete the design vision for the project has successfully been achieved.

I am very pleased with the products supplied by Tobermore. I would recommend Tobermore products to other architects, contractors or developers.

Liam Haggarty
