The Challenge

To develop a beautiful and distinctive new housing development in Currie to the West of Edinburgh.

CALA Homes developed Kinleith Mill, a beautiful and distinctive new housing development in Currie to the West of Edinburgh, and in keeping with the housebuilders high quality standards, the team wanted to ensure that the most appropriate building and hard landscaping materials were sourced for the site.

The Solution

Tobermore which surpassed expectations.

Tobermore's Scottish Sales team introduced the housebuilder to the superior facing brick and paving products produced at Tobermore which surpassed expectation. Tobermore's timeless Lansdowne facing brick was selected for incorporation on the properties at Kinleith Mill and vibrant Pedesta block paving was specified as a complementary hard landscaping solution.

Alan explained that their choice of facing brick was made very easy when they were presented with Tobermore's Lansdowne product. Lansdowne undergoes a tumbling manufacturing process that produces a charming weathered look and is ideal for applications that require a warm, elegant finish.
