The Challenge

Global nutrition group, Glanbia, made the decision to have the company headquarters, Glanbia House in Kilkenny, refurbished with a new landscape scheme as a method of modernising the commercial office blocks.

JJ Digby, Landscape Architect at Digby Brady, explained the objectives set out for the external refurbishment works:

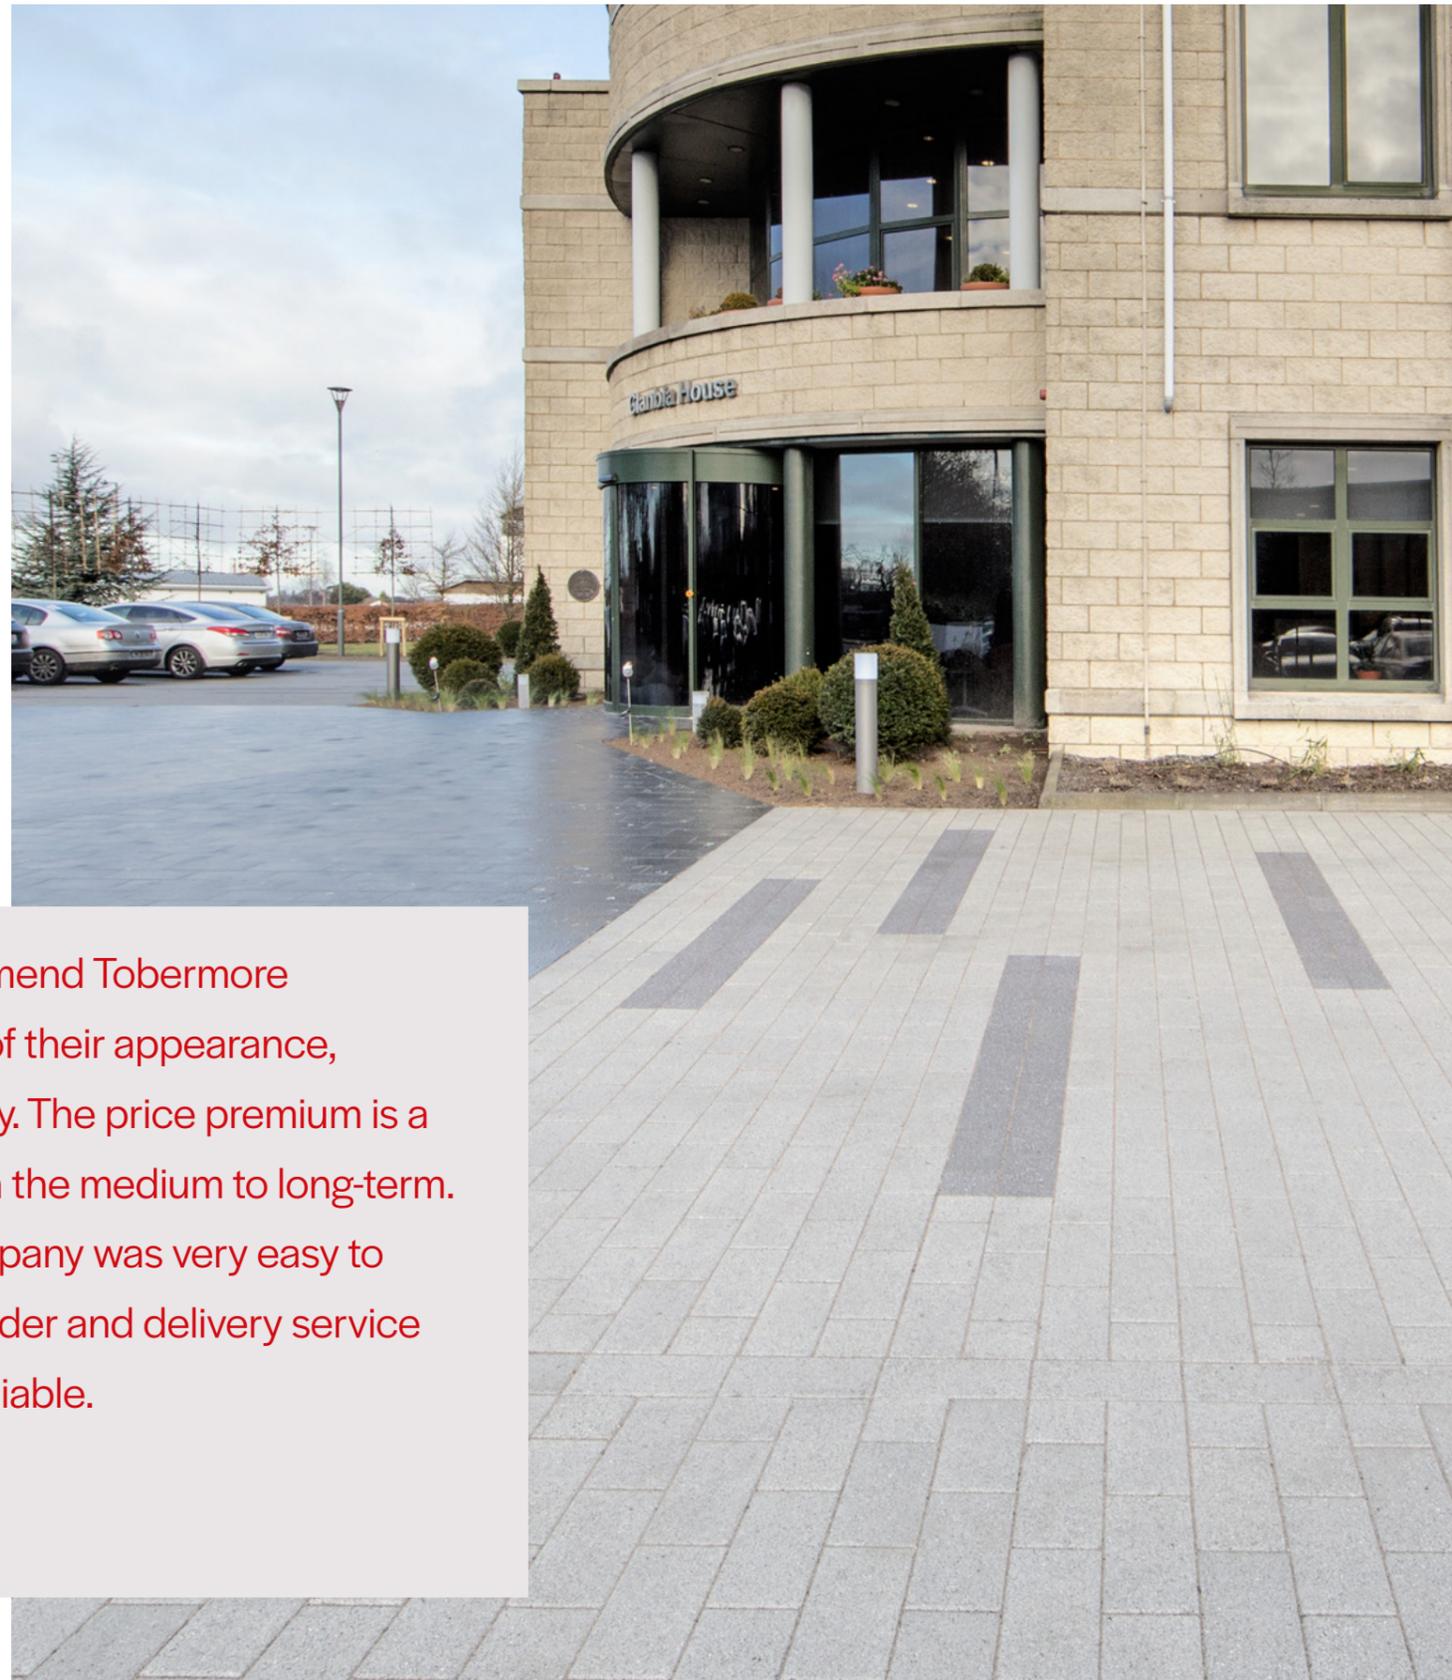

“The existing hard and soft landscaping at Glanbia House was implemented approximately twenty years ago, therefore, the main objective was to achieve a result that better reflected the corporate headquarters of a leading global firm. This included using a new suite of materials to improve and rationalise the overall layout of the landscape.”

We strongly recommend Tobermore products because of their appearance, quality and durability. The price premium is a sound investment in the medium to long-term. In addition, the company was very easy to deal with and the order and delivery service was efficient and reliable.

The Solution

City Pave VS5 and Fusion block paving.

Following discussions with Tobermore’s ROI Sales team and the provision of product samples and technical guidance, the landscape architect had no doubt that Tobermore products were the superior product choice. JJ noted: *“Tobermore products were specified due to their longevity and durability. The products that had been used previously had not aged well visually or performed well structurally.”*

City Pave VS5 and Fusion block paving were the chosen Tobermore products. City Pave VS5 is an interlocking paving system that is manufactured with shift protection on five sides of the block to provide maximum pavement stability.

JJ concluded: *“We strongly recommend Tobermore products because of their appearance, quality and durability. The price premium is a sound investment in the medium to long-term. In addition, the company was very easy to deal with and the order and delivery service was efficient and reliable.”*
