The Challenge

Aesthetically pleasing permeable paving was required to mitigate flood risk.

Hunsdon Lodge Farm is a new modern development consisting of 14 beautiful homes. Situated in the idyllic village of Hunsdon, the properties offer a charming finish.

Liam McGrenaghan, Site Manager at J&L Build, explained: "Our biggest issue was the drainage under the road. High quality permeable paving was required to mitigate flood risk. We had to carefully consider a product that would allow for efficient drainage and water movement."

To enhance the external area of the properties, the developer sought a permeable solution that complemented the homes' aesthetic. Colour retention was of utmost importance and the quality of the products needed to be of a high standard.

Tobermore provided us with good looking paving products that offered good value for money. The quality of Tobermore paving is superior to competitors whose products look weathered after a few years. We would definitely recommend Tobermore. Their products and service were great. I couldn't believe you could order on a Monday or Tuesday and the order would be there by the end of the week. Very happy all round!"

Liam McGrenaghan
Site Manager at J&L Build

The Solution

Hydropave Tegula provides the perfect permeable paving solution.

Tobermore's Hydropave Tegula in Slate and Bracken were chosen for the charming development. The permeable block paving provides an aged, antique appearance which evokes timeless style and elegance.

Hydropave Tegula functions as a SuDs system and offers valuable environmental benefits, which made it the perfect solution to mitigate the flood risk.

Liam McGrenaghan, Site Manager at J&L Build, explained: "Tobermore's Hydropave system allows the water to filter into the ground and stops flooding and excess water runoff."

Several of the back patio areas of the properties featured Tobermore's Historic flags in the shade bracken. With their attractive appearance and hard-wearing surface, Historic flags offered a rustic finish to each outdoor space.
