The Challenge

Paving with character was required for one of the UK's most biodiverse developments

Working in conjunction with London Wildlife Trust, Berkeley Group's design objective was strongly influenced by the environment surrounding the scheme. The overall aim of the multifunctional location was to encourage users to socialise and enjoy the open space and facilities available.

Residents can enjoy 13 acres of parkland across 2 new parks in addition to outdoor leisure spaces including an amphitheatre, play areas, and fitness trails.

The Green Quarter hard landscaping design needed to tie in with the vibrant nature of the area. A functional yet aesthetically pleasing solution was required, ensuring commuter-friendly paving options. Due to the scale of the location, creative laying patterns were required to add character and break up the space.

The sheer amount of outdoor space is absolutely unique for a site this close to the Capital."

Marcus Adams

Managing Partner at JTP

At The Green Quarter we believe the benefits of nature and the sense of wellbeing that nature brings should be part of everyday life."

Kym Jones

MD at Applied Landscape Design

The Solution

Tobermore's Artro adds vibrance and personality to the transformed development

Tobermore worked closely with the project team throughout the design process offering complimentary paving visualisations and bespoke sample panels for the extensive hard landscaping on the scheme. The visualisation and sample service provided confidence in the final product selection.

With creativity at its core, Artro block paving was laid in an interesting five-way colour mix of Heather, Bracken, Autumn, Slate and Carbon in a trendy herringbone pattern. Other pedestrianised zones feature Artro in warm clay-like tones of Heather and Autumn in a stretcher bond laying pattern. Artro's ability to create unique design patterns by seamlessly blending various colour tones adds originality and personality to the scheme.

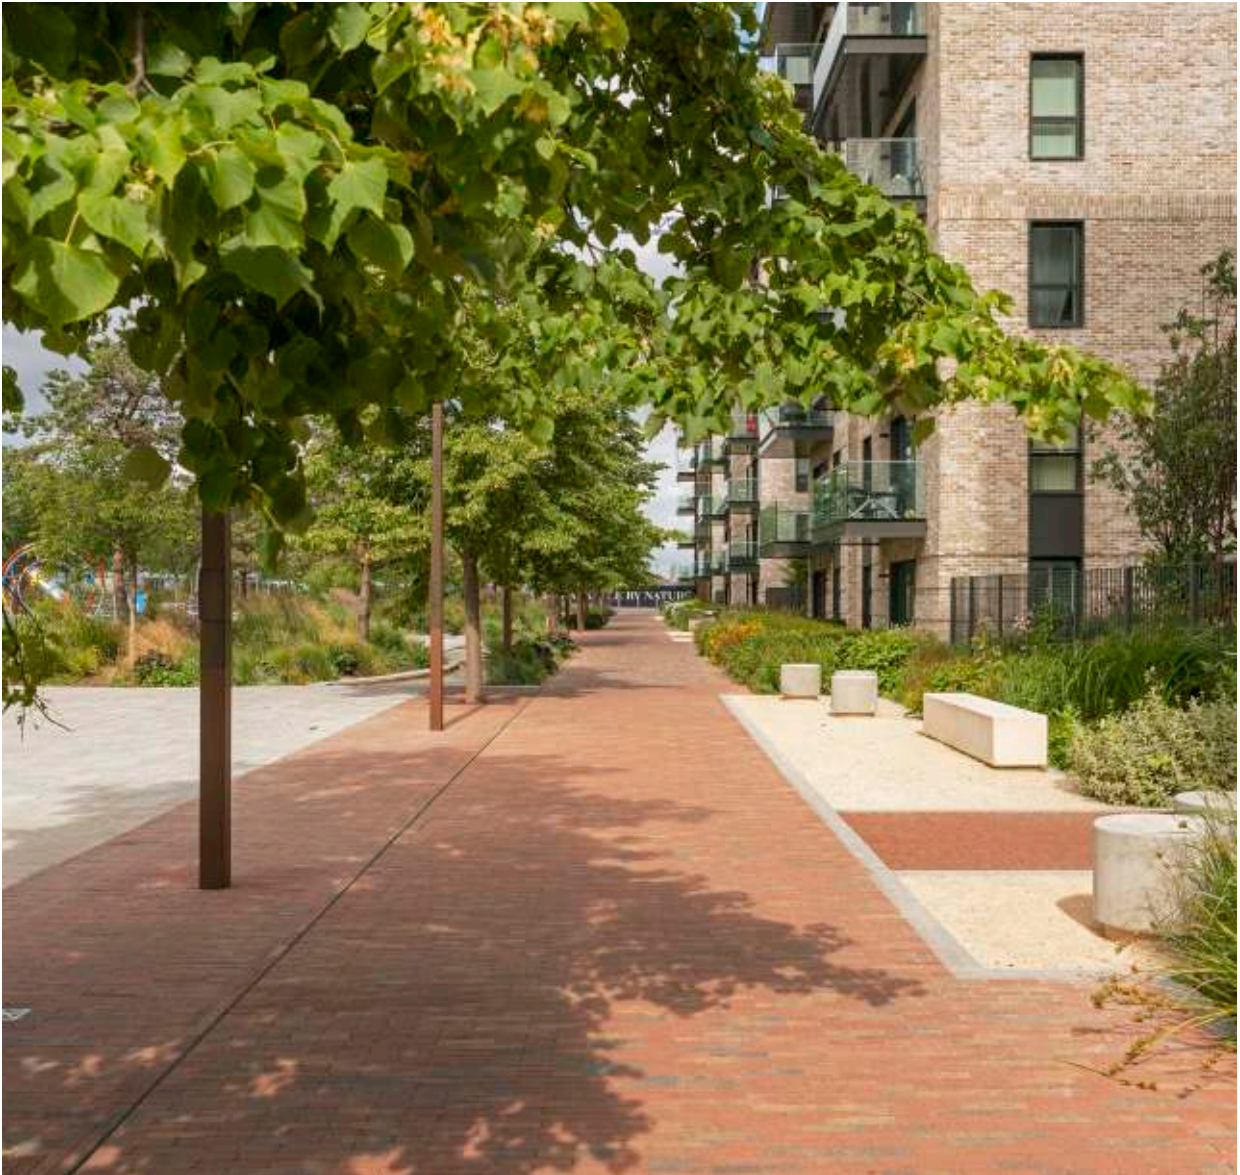

Outdoor leisure spaces including an amphitheatre, play areas, and fitness trails provide a place for residents to unwind. Community events including outdoor cinema screenings and food markets will create a thriving new neighbourhood. There will also be a new primary school, health centre and community facility.

Thanks to Tobermore's PrimeTop hard-wearing surface layer, residents can be confident that Artro will retain its original appearance for many years to come.
